

Tank AID

Alarms, Inventory,
Deliveries - Simplified

PREDICTIVE AI & REAL-TIME FUEL INTELLIGENCE

Eliminate stockouts, optimize working capital, and streamline ATG alarm response—all in one intelligent platform.

AI Intelligence

Automated Ordering

Powered by predictive AI, Tank AID analyzes historical usage trends and live sales velocity to forecast exact order requirements. Eliminate stockout risks, optimize working capital, and deliver automated order streams directly into dispatch workflows without manual intervention.

Zero-Friction Setup

Direct IP polling or ATG email parsing connects immediately. Plug-and-play architecture with no expensive network overhauls required.

Tank AID combines self-learning demand forecasting with smart ATG alarm intelligence. The system continuously refines order accuracy based on live site behavior while delivering real-time, prioritized alarm notifications reducing manual oversight.

Simplify Workflows

Centralized Alarm Center

Triage and resolve critical ATG alerts with automated team escalation, notification, & close-out workflows.

Centralised ATG Alarm and Dispatch Center

Financial Savings

Optimize Working Capital

Maintains dynamic min/max stock thresholds to protect cash flow while eliminating stockout risks across all products.

TGP Load Shifting

Monitors daily Terminal Gate Price (TGP) fluctuations to recommend strategic buy dates—shifting loads when prices drop to grow margins.

Live Dispatch Assistant

In-Shift Live Plan Verification

Checks scheduled orders against sales velocity, alerting dispatchers to re-balance orders before trucks depart terminals.

Automate Dispatch Tasks

Eliminates manual ATG checking, spreadsheet calculations, and phone orders—saving hours of dispatcher and site manager workload every day.

PROVEN NETWORK IMPACT

- 80% Reduction in Manual Tasks
- TGP Load Shift Savings
- Minimize Unplanned Stockouts

TAKE CONTROL OF YOUR TANK NETWORK

Quick setup, no start up fees... Let our fuel analytics team model your site data to demonstrate ATG alarms simplified, TGP price savings and dispatch efficiency gains.
